

# Evan Kazuo Kuranishi

Senior Technical Writer | Content & Systems Architect

ekuranishi@gmail.com | 808.292.4616 | kazuo459.github.io | Kapolei, HI (Remote)

## SUMMARY

---

Senior technical writer with 9+ years documenting developer platforms and complex technical systems at AWS, Apple, and Waymo (via TaskUs). Deep practitioner of docs-as-code — Markdown, HTML, AsciiDoc, Git/GitHub, and VS Code — with a track record of moving documentation quality metrics: developer guides lifted from the bottom 30% to the top 30% of CSAT across AWS, duplicate content cut by 70%, and review workflows accelerated by 50%. Repeatedly trusted to lead large information architecture programs, including CMS migrations of 2,000+ and 10,000+ articles, and to invent new ways to author and deliver content, including agentic AI documentation workflows built with Amazon Q, Bedrock, Cline, and NotebookLM.

## WORK EXPERIENCE

---

### Senior Systems & Content Architect (Independent Contractor / Advisor)

Dec 2025 – Present

*TaskUs — supporting Waymo Ride-Hail Operations*

- Advise and implement content management, content structure, and content process improvements for the documentation used by internal operations teams supporting the Waymo ride-hail service.
- Designed and piloted a content re-architecture that reduced duplicate content by 70%, improved readability, and streamlined the content review process; stakeholder results secured expansion from pilot into a full program.
- Serve as Senior Systems Architect leading the migration to the Brightspot CMS: own the content strategy, define system requirements, and partner directly with the Brightspot vendor on system development and implementation.
- Own the end-to-end migration plan for 2,000+ articles across 12+ operations verticals spanning three countries; lead, advise, and train system administrators and content authors to operate and scale the new platform.
- Applied Google NotebookLM and prompt engineering to capture and synthesize content from 100+ documents and training slides, designing a prompt-driven workflow of structured inputs and outputs that produced a finalized requirements database — now the source of truth for all learning objectives feeding documentation and training.

### Senior Technical Writer

Jun 2022 – Aug 2025

*Amazon — Amazon Web Services, Cloud AI/ML Developer Tools*

- Owned customer-facing documentation for high-visibility AWS services, including the AWS Cloud Development Kit (CDK) with 100K+ weekly views globally; partnered daily with service engineers, product managers, and customers to improve freshness, quality, and accuracy.
- Rearchitected the AWS CDK content pipeline into a docs-as-code model: a single source of truth in GitHub, AsciiDoc source, version control, and pull-request-based content review aligned with engineering workflows — improving draft, review, and approval throughput by 50%.
- Rewrote and restructured underperforming developer guides using a framework of intentional, intuitive, and integrated content, lifting their customer satisfaction scores from the bottom 30% to the top 30% across all of AWS.
- Provided one-to-one mentorship to five technical writers over a year; their services averaged a 20% increase in customer satisfaction scores.
- Co-developed internal AI documentation tooling with a core team of Principal and Senior writers using Amazon Q, Amazon Q CLI, Cline, and Amazon Bedrock. Designed agentic workflows in which role-based agents — author, editor, and subject-matter expert — gathered their own context through RAG and scripts integrated with internal databases, improving the efficiency and quality of drafting and publishing while keeping a human in the loop for quality checks and improvements.

## Operations Systems Administrator & Training Program Manager

Jun 2019 – Jun 2022

*Apple — Special Projects Operations, Autonomous Driving Systems*

- Core member of a 3-person team that built the Learning & Development function delivering documentation and training for autonomous drivers performing safety-critical work on public roads.
- Made documentation the single source of truth across documentation, instructional design, and training; implemented a scalable train-the-trainer model to transfer subject-matter expertise.
- Identified requirements, evaluated vendors, and implemented integrated Learning, Content, Access, Task, and Device Management systems (Confluence, EduBrite, Jira, Apple Directory, Jamf); hired and mentored the administrators who ran them as operations scaled from 30 to 300+ personnel.
- Built Python tooling and automated workflows for compliance reporting and admin tasks, automating 50% of everyday administrative work across systems.
- Redesigned role requirements and screening assessments with vendor partners, raising new-hire certification pass rates from 50% to 80%.

## Lead Technical Writer & Documentation Systems Administrator

Jun 2018 – Jun 2019

*Apple — Apple Maps Learning & Development*

- Led a large-scale information architecture and migration program consolidating 10,000+ articles from multiple internal databases across 10 lines of business into a standalone Confluence CMS — defining content strategy, migration tracking, validation, and vendor staffing.
- Architected the CMS content structure, permissions model, style guides, templates, and documentation workflows; led and mentored a distributed team of FTE and vendor technical writers across multiple countries.

## Technical Writer & Training Program Manager

Jun 2017 – Jun 2018

*Apple — Apple Maps Operations*

- Translated technical content from Field Operations SMEs into documentation for field personnel worldwide, covering internal systems, emerging issues, and operational procedures.
- Designed a scalable train-the-trainer program and coordinated vendor teams across Europe and the USA to scale data-collection operations from 100 to 1,000+ field personnel.

## Apple Genius & AppleCare Support Agent

Jun 2014 – Jun 2017

*Apple — Apple Store and AppleCare*

- Provided hardware and software troubleshooting across all Apple products; led the Hawaii market in both low appointment times and high customer satisfaction, and mentored fellow technicians on achieving both.

## SKILLS

---

**Authoring & Docs-as-Code:** Markdown, HTML, AsciiDoc, XML, YAML | Git & GitHub, VS Code | Pull-request-based review workflows | Style guides, templates, information architecture

**Programming & Cloud:** Python, TypeScript, CSS | AWS cloud technologies & infrastructure as code (AWS CDK)

**Generative AI:** Prompt engineering, context management, RAG knowledge bases, agentic workflows & role-based agents, human-in-the-loop review | Amazon Q & Q CLI, Amazon Bedrock, Cline, Google NotebookLM

**Content Systems & Analytics:** Brightspot CMS, Confluence, Jira, learning management systems, Jamf | Adobe Analytics, Tableau | Content performance analysis & curation

**Programs & People:** Technical writer mentorship | Vendor & stakeholder management | Backlog, sprint, and Kanban management | Process improvement

## EDUCATION & CERTIFICATIONS

---

B.A. in Business Entrepreneurship, University of Hawaii at Manoa

AWS Certified Cloud Practitioner | AWS Certified AI Practitioner | Jamf 100, 200 & 300 | Apple Certified iOS & macOS Technician
